Weather and chance of precipitation at 800m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Light rain	Heavy Rain	Sleet	Heavy snow	Light snow	Partly cloudy (night)
Precipitation probability					
60%	>95%	70%	80%	60%	20%

Forecast for Monday 21 Nov 2022

Weather: Rain soon spreading from west in morning and becoming heavy and prolonged with snow over the summits, though probably turning more sleety in morning. Becoming more showery in the evening, but still some heavy rain and summit snow at times with perhaps the odd rumble of thunder.

Chance of cloud-free hill tops above 800m: Little chance through the day.

Low Cloud and visibility: Extensive cloud above 500m by morning and occasional broken down to 400m in rain. Mostly moderate to good visibility beneath cloud, but poor or very poor in heavy rain, snow and widely at height.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Some considerable doubt as to track of low pressure moving southeast across the SW of the UK, with the risk of stronger winds and possibly shifting into the west or southwest then later northwest, should the low be further north.

Forecast for Tuesday 22 Nov 2022

Weather: Rain or showers overnight, with snow on the tops, but mainly dry by morning with some clear spells. Then a mostly dry, bright, but chilly start with some sunny spells, but cloud and further rain or showers will spread from west in the morning, though sleet or snow becoming more confined to higher summits with freezing level rising. Drier with clear spells in the evening.

Maximum wind: North or northeast 10-15mph at first becoming southwest 20mph in morning then westerly 30 gust 45mph in the afternoon, but southwest 20-25mph in evening

Chance of cloud-free hill tops above 800m: 10% improving 60% overnight. Becoming 20% in morning, but 70% in evening.

Low Cloud and visibility: Extensive above 500-700m in early hours, but broken perhaps scattered 800-900m at first Tuesday. Becoming rather extensive 700m in morning with broken cloud down to 500m in rain and showers. Cloud breaking up in evening. Poor occasionally very poor visibility at height, but mostly good on lower slopes out of rain and also on higher slopes for a time in morning.

Temperature: **Valleys:** Plus 2 C rising to 8 C
At 800m: 2 C rising to 4 C
Freezing level: Falling to 900m overnight then rising to 1100m in morning
